PROFESSIONAL SUMMARY

Cybersecurity Analyst with 4+ years of blue team experience in incident response, threat hunting, detection engineering, and digital forensics, serving as the highest technical escalation point for a managed SOC. Protects 400+ endpoints across Azure, AWS, GCP, hybrid, and on-prem environments using Microsoft Sentinel, CrowdStrike Falcon, Wazuh, and Splunk. Reduced false-positive alerts through detection tuning, automated host containment with SOAR, and authored the SOPs and playbooks that standardize SOC response. Experienced briefing both technical teams and executive stakeholders.

TECHNICAL SKILLS

SIEM & EDR: Microsoft Sentinel, Splunk, Wazuh, CrowdStrike Falcon, CrowdStrike LogScale, Microsoft Defender for Endpoint, KQL

Incident Response & Threat Hunting: Incident Investigation, IR Lifecycle, Threat Hunting, Adversary Infrastructure Analysis, MITRE ATT&CK, IOC/IOA Analysis, Playbook & SOP Development

Detection Engineering & Automation: Detection Rule Development, Alert Tuning, CrowdStrike Fusion SOAR, PowerShell, Python, n8n

Cloud & Identity: Microsoft Azure, AWS, Google Cloud Platform (GCP)

Threat Intelligence & OSINT: MISP, Shodan, AbuseIPDB, Abuse.ch, Maltiverse, Lumu, SpiderFoot, Maltego, Recon-ng

Vulnerability Management: Nessus, Greenbone, Cavelo, Rapid7

Digital Forensics: Autopsy, FTK Imager, Sleuth Kit, Wireshark, HxD, Prefetch & Jump List Analysis

Frameworks: NIST CSF, MITRE ATT&CK, Zero Trust, Defense in Depth

Networking & Systems: TCP/IP, OSI Model, VLANs, Windows, Linux, Kali Linux, macOS, VMware, Proxmox, Docker, FLARE VM

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst II

Sep 2023 – Present

Dataprise (MSSP)

North Bergen, NJ

- Serve as the highest technical escalation point for SOC investigations, supporting incident response engagements involving advanced threat actors and enterprise breaches.
- Investigate alerts in CrowdStrike Falcon and Microsoft Sentinel, analyzing host telemetry and logs to identify IOCs/IOAs for malware, account compromise, and unauthorized activity.
- Implemented automated host containment (Attack Disruption) with CrowdStrike Fusion SOAR to isolate compromised systems based on vetted detections, shortening response time.
- Designed enterprise detection and telemetry dashboards in CrowdStrike LogScale and Microsoft Sentinel (KQL), improving SOC visibility across managed client environments.
- Manage 400+ endpoints in CrowdStrike: enforce EDR policies, coordinate sensor deployments, and build detection workflows and automated playbooks with PowerShell and Python.
- Conduct proactive threat hunting and adversary infrastructure analysis using telemetry, OSINT, adversary TTPs, and emerging threat intelligence feeds.
- Authored incident response SOPs and playbooks; trained Tier 1 analysts; deliver monthly client briefings on threats, vulnerabilities, and remediation, plus ongoing intelligence updates to analysts and stakeholders.
- Run security awareness programs (KnowBe4, Breach Secure Now) for 200 accounts, including automated training, phishing simulations, and monthly newsletters.
- Selected by the Cyber Department President to lead a vendor evaluation of security awareness tools, assessing efficiency, scalability, and AI capabilities.

Cybersecurity Engineer

Sep 2022 – Sep 2023

Cohere Cyber Secure (MSSP)

Manhattan, NY

- Triage security incidents, including ransomware, following the Incident Response Framework; performed host- and network-based forensics to determine root cause and preserve evidence.
- Onboarded clients to Wazuh SIEM and built custom detection rules and parsers (regex, threshold tuning), improving alert fidelity.
- Configured CrowdStrike Falcon policies to harden environments and prevent attacker lateral movement.

- Ran quarterly vulnerability assessments with Nessus and CrowdStrike; applied CVSS scoring, reported findings to clients, and coordinated remediation planning.
- Delivered After-Action Reports covering penetration test scope, risk management, mitigation strategies, and lessons learned.
- Developed incident response, ransomware, phishing, and Wazuh deployment SOPs and playbooks to standardize response and client onboarding.

Operations Manager
Bocaphe

Jan 2020 – Sep 2022
Manhattan, NY

- Recruited, trained, and scheduled staff; supported internal POS systems and remote troubleshooting (AnyDesk, TeamViewer), and set up new software and systems.

Freelance IT Technician
Self-Employed

Jan 2013 – Sep 2021
Ouagadougou, Burkina Faso & Manhattan, NY

- Provided hardware maintenance, upgrades, and IT support for third-party clients; installed and configured operating systems, VMware, Wireshark, antivirus, Office 365, Azure, and Linux.

CERTIFICATIONS

- CrowdStrike Certified Falcon Administrator (CCFA-200)
- Microsoft Certified: Cloud and AI Security Engineer Associate (SC-500)
- Microsoft Certified: Security Operations Analyst Associate (SC-200)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900)
- CompTIA Security+ (SY0-601)

EDUCATION

M.S., Digital Forensics and Cybersecurity
John Jay College of Criminal Justice (CUNY)

May 2022
New York, NY

Advanced Certificate, Applied Digital Forensics
John Jay College of Criminal Justice (CUNY)

May 2022
New York, NY

B.S., Computer Science and Information Security
John Jay College of Criminal Justice (CUNY)

Dec 2020
New York, NY

A.S., Computer Network Technology
Borough of Manhattan Community College (CUNY)

May 2019
New York, NY

SELECTED PROJECTS

Threat Intelligence & SIEM Integration Lab | *Proxmox VE, Wazuh, MISP, Sysmon, Python*

2024

- Built a Proxmox-based SOC lab with Wazuh and MISP; integrated the MISP API with Wazuh for automated IoC correlation (malicious IPs, domains, file hashes).
- Deployed Wazuh agents and Sysmon on Windows endpoints to validate real-time detection and alerting workflows.

Azure Sentinel Live Cyber Attack Map | *PowerShell, KQL, Microsoft Sentinel*

2022

- Forwarded Windows Event Viewer data to a geolocation API with PowerShell and built a Sentinel workbook mapping global RDP brute-force attacks in real time.

Digital Forensic Investigation | *Autopsy, FTK Imager, Prefetch, Jump Lists*

2022

- Acted as forensic investigator on data-theft and intrusion case scenarios; preserved evidence, maintained chain of custody, and produced investigative reports.

Raspberry Pi SOC & Pentesting Homelab | *Docker, Portainer, Kali Linux, SSH*

2021

- Built an isolated, containerized lab (Kali, Metasploitable) on Raspberry Pi for penetration testing and attack simulation without exposing the home network.
