Results-driven Cybersecurity Analyst with 4+ years in blue team operations, incident response, and digital forensics. Experienced in leveraging SIEM (Microsoft Sentinel, Wazuh, Splunk) and EDR (CrowdStrike Falcon, Microsoft Defender) to protect 400+ endpoints across public cloud (Azure, Google, AWS), hybrid, and on-prem environments. Proven track record in reducing false-positive alerts by 25%, leading SOC teams, and conducting comprehensive security gap assessments. Skilled in developing SOPs, performing threat hunting, and delivering executive-level security briefings to technical and non-technical stakeholders.

EXPERIENCE

Dataprise (MSSP-Cohere)

Sep 2023 – Present

Cybersecurity Analyst II

- Designed and deployed enterprise detection and telemetry dashboards in CrowdStrike LogScale and Microsoft Sentinel, improving SOC visibility across managed environments.
- Implemented automated host containment workflows (Attack Disruption) using CrowdStrike Fusion to isolate compromised systems based on vetted detection alerts.
- Served as the highest technical escalation point for SOC investigations, supporting incident response engagements involving advanced threat actors and enterprise breaches.
- Conducted proactive threat hunting and adversary infrastructure analysis using telemetry, OSINT sources, and emerging intelligence feeds.
- Monitored and investigated security alerts across CrowdStrike Falcon and Microsoft Sentinel, analyzing host telemetry and log data to identify suspicious activity and potential compromise.
- Conducted incident investigations including malware detections, account compromise, and unauthorized activity across managed environments.
- Managed over 400 endpoints using CrowdStrike: enforced EDR policies, coordinated sensor deployments, and developed detection workflows and automated tasks using PowerShell and Python.
- Security awareness training (KnowBe4, PII-Protect "Breach Secure Now"): oversaw 200 accounts, created automated training programs, phishing simulations, and monthly newsletters.
- Appointed by Cyber Department President to lead a vendor evaluation project assessing cybersecurity awareness tools measuring efficiency, scalability, and AI capabilities.
- Led creation of incident response SOPs; trained Tier 1 SOC analysts and delivered monthly client briefings including vulnerability and remediation reports.
- Provided ongoing intelligence briefings regarding emerging threats, cybercrime trends, and new indicators of compromise.

Cohere Cyber Secure (MSSP)

Sept 2022 – Sep 2023

Cybersecurity Engineer

- Provided overall security posture assessments in After-Action Reports covering penetration testing scope, risk management, mitigation strategies, and lessons learned.
- Triageed security incidents including ransomware, following the Incident Response Framework and performing host- and network-based forensics to determine root cause and preserve evidence.
- Configured policies in CrowdStrike to harden environments and prevent attacker lateral movement.
- Monitored, created rules, and onboarded clients to SIEM (Wazuh), developing custom detection rules and parsers using regex and threshold tuning to improve alert fidelity.
- Developed Incident Response, ransomware, phishing, and Wazuh deployment SOPs to standardize response and onboarding procedures.
- Conducted quarterly Vulnerability Assessments using Nessus and CrowdStrike; communicated findings to clients and coordinated remediation planning.
- Monitored and analyzed Linux operating systems for security threats and vulnerabilities, implementing timely remediation.

Bocaphe

Jan 2020 – Sep 2022

Operation Manager

- Conducted recruitment, training, and scheduling of new employees.
- Provided support for all internal POS systems and utilized AnyDesk/TeamViewer for tablet-based internal computer troubleshooting.
- Facilitated software setup for new technological products and internal systems.

Freelancer IT

Jan 2013 - Sep 2021

- Provided maintenance and hardware upgrades for PCs and laptops.
- Installed and configured software and applications including operating systems, VMware, Wireshark, antivirus, Office 365, Azure, and Linux.
- Delivered IT support assistance to third-party clients.

CERTIFICATIONS AND DEGREES

John Jay College of Criminal Justice

New York, NY

- M.S. Digital Forensics and Cybersecurity May 2022
- A.C. P.B. Applied Digital Forensic ACB May 2022
- B.S. Computer Science and Information Security Dec 2020

Certifications

- CompTia Security +
- CrowdStrike Certified Falcon Administrator CCFA-200
- Microsoft Certified: Security Operations Analyst Associate SC-200
- Microsoft Certified: Azure Administrator Associate AZ-104
- Microsoft Certified: Security, Compliance, and Identity Fundamentals SC-900

SKILLS

SIEM & EDR: Microsoft Sentinel, Splunk, Wazuh, CrowdStrike Falcon, Microsoft Defender for Endpoint

Threat Hunting & Incident Response: Threat Hunting, Incident Investigation, Adversary Infrastructure Analysis, Detection Engineering, Incident Response Lifecycle, MITRE ATT&CK

Detection & Platform Engineering: CrowdStrike Falcon, CrowdStrike LogScale, Microsoft Sentinel (KQL), Detection Rule Development, Security Telemetry Engineering, Automation Workflows

Vulnerability Management: Nessus, Greenbone, Cavelo, Vulnerability Assessment, Remediation Tracking

Threat Intelligence & OSINT: MISP, AbuseIPDB, Abuse.ch, Shodan, Maltiverse, Lumu, SpiderFoot, Maltego, Recon-ng

Digital Forensics: Autopsy, FTK Imager, Sleuth Kit, Wireshark, HxD Hex Editor, Jump List Analysis, Prefetch Analysis, USB Forensic Tracker, HashMyFiles

Networking: TCP/IP, OSI Model, VLANs, Network Traffic Analysis, Cisco Packet Tracer

Security Workflow & Automation: PowerShell, Python, n8n. script

Cloud & Identity Management: Microsoft Azure, Microsoft Intune, Active Directory, Google Cloud Platform (GCP)

Virtualization & Lab Environments: VMware, VirtualBox, Proxmox Virtual Environment, FLARE VM

Operating Systems: Windows, Windows Server, Linux, Ubuntu, Kali Linux, Parrot OS, macOS

Languages: English, French — Professional Proficiency
